Dr. Stephen Sundlof  
FDA Center for Veterinary Medicine  
7500 Standish Place  
Rockville, MD 20855

Dr. Sundlof:

I urge you to cease feeding drugs to farm animals for the purpose of causing their rapid growth. This is cruel and inhuman and should never have been allowed.

**The farm animals today that are raised in factories suffer horribly up to and including their deaths. Feeding them drugs is more than just another assault.**

**Scientists are learning more every day that animals are much smarter and are more like humans than they ever believed. Their suffering is enough for them to bear.**

**Please see that this inhumanity is stopped.**

Thank you for "listening."

Sincerely,

Ms. Gayle Harris Birk
